

INCREASE YOUR COMPETITIVENESS WITH PROGRESSUS

What was the challenge that needed to be addressed?

We felt a need to prepare, upgrade and position ourselves for the future when it came to having the best offer possible within project resource (PSA) and financial management (ERP).

The challenge was that the most common set-up for companies today is having separate solutions for PSA and ERP and trying to get them to function together as a cohesive process. However, the fact is that it does not hold from an ERP perspective since it will still require many manual steps that will corrupt the process and become a headache that requires a lot of manual application.

Why was the Progressus-solution chosen?

Elbek & Vejrup has for many years worked with PSA solutions, and our assessment was that the Progressus solution was the best choice for our customers. The Progressus solution met all the advanced requirements that we had re. an integrated PSA/ERP-solution. Also, it is an app that is developed together with Microsoft which not only brings credibility, but also provides us with confidence and security.

Together with Progressus Europe's competence and support on a local basis were we able to significantly upgrade this business area and can now provide our clients with a best-in-class offer.

About Elbek & Vejrup
