

PROGRESSUS IS THE PERFECT PSA/ERP SOLUTION

sopra  steria

What was the challenge that needed to be addressed?

Sopra Steria had all the components for the Microsoft Power Platform but needed to supplement it with a top-of-the-line D365 ERP-solution.

By doing this Sopra Steria would not only be able to differentiate itself from the competition, but also provide a strong and competitive offer to the Professional Services-industry. This is a prioritized line of business with great potential for Sopra Steria. Several solutions were reviewed until the Progressus solution was chosen.

Why was the Progressus-solution chosen?

Progressus had a fully integrated PSA/ERP All-in-one offer on the Microsoft power platform which can be supplemented with other areas such as Power BI, CRM, O365 etc. This was in line with Sopra Sterias strategy and our total offer, as well as being a good fit with our team's competence and experience.

Progressus Europe also brought strong support, competence & experience which is important when partnering with an outside company in building a completely new business area.

About Sopra Steria, Sweden

- International consulting company and leader in digital transformation of medium-sized and large organizations.
- Probably Sweden's' largest Dynamics 365 team covering the complete platform from ERP to Field Service.
- Sopra Steria covers the complete Microsoft 365 ecosystem.
- 46,000 employees worldwide in 25 countries with 450 in Sweden.
- Ranked by Gartner as a top 5 company in Europe within Digital Transformation.

“Progressus PSA is a perfect complement to the range of services that we offer. Apart from being a cutting-edge PSA/ERP All-in-one-solution, it is also a way for us to grow customer engagement, make the business grow with the customer as well as create new business opportunities between business areas.”
